SUMMARY

Aspiring developer with a strong foundation in software development and problem-solving. Proficient in various programming languages and technologies. Committed to delivering effective solutions.

EDUCATION

Master of Computer Application Sri Jayachamarajendra College of Engineering, Mysuru CGPA: 8.5	Aug. 2023
Bachelor of Science JSS College of arts commerce and science, Mysuru CGPA: 8.03	Sep. 2021
Pre-University Course Maharaja GOVT PU college, Mysuru Percentage: 79 %	Mar.2018
Secondary Education Adarshan Vidhyalaya, Pandavapura Percentage:83.84 %	Apr.2016

SKILLS

Languages: Java, Javascript, SQL, C#.
Frameworks: ReactJS, NodeJS.
Tools: mySql, postgresSql, Excel, PowerPoint ,Git Bash FIGMA.
Platforms: NetBeans, VS Code, visual Studio, AWS Console, PG Admin.
Other Skills: AWS , UI / UX Design, Documentations, Debuging.
Soft Skills : Teamwork, Adaptability, Problem-solving.

WORK EXPERIENCE

- Training Internship** **Dec 23 – Present**
Sharp Software Development India | [LINK](#)
During my internship, I designed a UI using MUI and ReactJS, developed an API using NodeJS, Lambda, and API Gateway, and worked on database management with PGAdmin, Figma, Postman, and AWS SES. Using these technologies, I developed the BookMyDesk project.
- Intern Software Developer** **Mar 23 – Aug 23**
Urneeds | [LINK](#)
I worked on the Inventory Management Module, a real-time project, designing the UI using MUI and ReactJS. I utilized Lambda, IAM, DynamoDB, API Gateway, Git, and Figma. Additionally, I used Jira for project management, participated in KT sessions, and attended scrum meetings.

PROJECTS

Book My Desk | [LINK](#)

- Developed the BookMyDesk project during my internship, a tool that allows employees to book their workspaces in advance and enables admins to manage employees and add desks, with email notification features using Brevo and Deployed to internet using vercel App.
- This was a group project where my major contribution was in backend development, focusing on seamless integration and functionality.
- Utilized a range of technologies including React for the front end, AWS services such as S3, API Gateway, and Lambda for serverless architecture, and PostgreSQL for database management.
- Created detailed wireframes using Figma prior to development to ensure a clear and structured design process.

Farmers Information System | [LINK](#)

- Developed the Farmers Information System project in college, enabling registered farmers to access information about new government schemes, chat one-to-one with officers, and get current vegetable prices and weather updates.
- The system also allows admins to add officers for each district and resolve farmers' queries.
- Utilized technologies including React for the front end, REST API for communication, and MySQL for database management.
- Focused on providing a comprehensive platform for effective communication and information dissemination between farmers and government officers.

Patent Reader | [LINK](#)

- Developed a simple project using ReactJS and Mammoth, a library for extracting data from input files.
- After data extraction, the model analyzed each section of the patent, listing the number of claims and identifying dependent and independent claims with their counts.
- Utilized regular expressions to distinguish different sections of the patent effectively.
- Focused on automating the analysis of patent documents to streamline the identification and categorization of claims.

Blogs | [LINK](#)

- Developed a blog project using the MERN stack, allowing end users to comment on blogs or articles with comments stored in the database alongside usernames.
- Focused on this project for educational purposes to learn and implement full-stack development principles.
